# VHS RESOURCES FOR CONSTRUCTION CAREERS

2017-2018

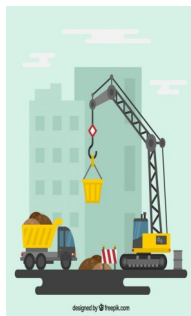

# Construction Trades

The construction industry is the nation's largest single industry, employing more people and contributing more money to America's bottom line than any other single industry. And with the need for new schools, hospitals, housing, and other commercial buildings increasing, the industry is going to need more and more quality workers to get all of the work done. In fact, the State of Oregon predicts that by 2020, we will need to fill 30,000 positions in the construction industry. From skilled trade workers, to designers and management positions, to support staff, permanent, well-paying construction careers exist in all areas of the industry.
